

**Curso Completo**

# **Aula 16**

## **Configurando o Capistrano**

# Gems

```
group :development do
```

```
  gem 'capistrano', '~> 3.7'
```

```
  gem 'capistrano-bundler', '~> 1.2'
```

```
  gem 'capistrano-rails', '~> 1.2'
```

```
end
```

# Gems

```
group :production do  
  gem 'mysql2'  
end
```

```
bundle install
```

```
bundle exec cap -v
```

```
bundle exec cap -T
```

# Gere os arquivos de configuração

```
bundle exec cap install
```

*Capfile*

*config/deploy.rb*

*config/deploy/production.rb*

*config/deploy/staging.rb*

*lib/capistrano/tasks # directory*

# Capfile

```
require 'capistrano/bundler'  
require 'capistrano/rails'
```

# Configuração Global

config/deploy.rb

ddb9ae427f0ecf6609a0a4d6](https://gist.github.com/jacksonpires/169c1935ddb9ae427f0ecf6609a0a4d6)

# Faça a configuração do ambiente

(config/deploy/production.rb)

```
role :app, %w{deploy@<IP>}  
role :web, %w{deploy@<IP>}  
role :db, %w{deploy@<IP>}
```

# Faça o primeiro deploy

```
bundle exec cap production deploy
```

```
bundle exec cap production deploy:check
```
