Adicionando e Configurando o Unicorn

Unicorn

https://bogomips.org/unicorn/

unicorn gem

https://github.com/defunkt/unicorn

Unicorn + Capistrano

```ruby
group :production do
    gem "unicorn"
end

group :development do
    gem "capistrano3-unicorn"
end

bundle install
bundle exec cap -T
```

Capfile

```
require 'capistrano3/unicorn'
```

Fluxos do Capistrano

http://capistranorb.com/documentation/getting-started/flow/

config/deploy.rb

```ruby
after 'deploy:publishing', 'deploy:restart'

namespace :deploy do
  task :restart do
    invoke 'unicorn:stop'
    invoke 'unicorn:start'
  end
end
```

config/unicorn/production.rb

https://gist.github.com/jacksonpires/9a6bf6b2
9a446881fd6fe6e5309cd08e

Faça um novo deploy

```
git add .
git commit -m "Configurando o Unicorn."
git push origin master

bundle exec cap production deploy
```

Comandos úteis

```
sudo service nginx restart
```

```
cap production unicorn:stop
cap production unicorn:start
```
